I hope you are all well

1686th Night Vigil of the Heavenly Garden

Summary of the Long Speech by the Director of the Heavenly Garden

Today, as we mark the 401st day since the suffering of the true mother, the church president, who has completed the 888th night vigil, reported, "The food for the Korean compatriots who sincerely wish for the unification of the two Koreas visited the DNZ (unarmed zone) together. Through the continuous night vigil, the faith of the food for the people is united, and I am convinced that the tradition of sincerity will bear fruit. We will continue to build the tower of sincerity towards 900 and 1000 times for the swift release of the innocent and the return of the emperor."

When the degree of sincerity is filled, divine things happen. If a divine minister happens in the church, if you are happy and grateful for it, the absolute faith standard for the true parents of heaven, earth, and people will be raised, and it will become a hopeful church that proceeds with divine spirit and truth. If the pastor and the spiritual 3-day training participants pray together with one heart, they can solve the

problem. There are trials and problems in the church because the leaders and the church gradually receive divine power by solving them.

The only word is the divine word: "If you are filled with the truth and stand up with determination, God will stand up with a microphone." When the preacher speaks with a true heart, God works through him. When we praise with a true heart and pray with a true heart, the fire of the divine word becomes a judge on this earth. To establish this standard, we are building the Tower of Perseverance at the Heavenly Heart Garden. The True Mother is praying for us for that.

The true mother says, "People around the world must realize that God is alive and working," and emphasizes that "we must strengthen the Tenjin-en prayer and move forward with divine spirit and truth." We believe that through the Tenjin-en spirit, we will deeply cultivate the unshakable roots of faith and become able to personally experience the true parent of the spiritual world, the heavenly father, and the true parents of heaven, earth, and humanity.

Testimony of a Spiritual Practitioner: I decided to enter public office through UPF4 and attended university, but I felt my limits and sometimes took a break from studying. I joined the military and was proven to be a member of the Unification Church, so I was criticized by my superiors and juniors, and I suffered the crucifixion with my true mother. However, by practicing the saying "forgive and love all those who persecute you and become one," I was recognized and received the Marine Corps Medal for exemplary service. I entered the spiritual training program to receive a divine answer on whether to take public office after being discharged. On the first day of the worship service, I saw my true father and felt that "I am always listening to your prayers," and I cried, dedicating myself to public service with all my might, and I vowed to become a leader who cultivates filial piety.

Testimony of a spiritual practitioner: My mother married a Korean man and had a child with him, but they separated and remarried, but they separated again. In her third marriage, she lived together, but she had a lonely pain because she was not the child of the real father, and she could not express the suffering of the difficult life. She believed in the words "Forgive, love, become one," and studied hard, and she was able to love by praying for the name of her father, who was a vengeful man. Looking back on her past life, she can pray for gratitude to her mother, and she is devoting 120 bows of worship every day to love her church brothers and sisters, and she is doing her best. She has decided to advance to the Moshim training and put into practice, and to become a true daughter who will return joy to her true parents.
